

Recycling in our Schools!

**Our Public Service Announcement
5th Grade Flag View Intermediate, Elko NV**

The Data we Collected

Elko School District does not have a Recycling Policy for its schools.

- People, businesses, schools and other organizations generate, on average, 4.7 pounds of waste per person every day.
- Schools and other education facilities often are among the largest waste generators in any city, county or state.
- At least 40 percent of the typical school waste stream is paper (the largest single component of all school waste).

The Data we Collected

- Every year, nearly 900 million trees are cut down to provide raw materials for U.S. paper and pulp mills.
- Each ton of recycled paper can save 17 trees, 380 gallons of oil, three cubic yards of landfill space, 4,000 kilowatts of electricity and 7,000 gallons of water.
- The energy used to recycle paper is about 70 percent less than the energy needed to make paper from virgin wood.
- Glass and plastic beverage containers account for about 15 percent of the school waste stream. Recycling just one glass bottle saves enough energy to power a 100-watt electric light bulb for four hours

Our Powerful Images!

These powerful images tell us why we should learn how to recycle in our schools.

Pollution is getting out of control but can be reduced and still many people don't recycle and pollute the oceans. People are now throwing their trash on beaches and coast that were used to be beautiful and now polluted. We can stop this by recycling and stop throwing our trash on beaches, streets, and other places so we can stop pollution. Only we can stop pollution and save the Earth and animals.

A photograph showing a large, messy pile of discarded plastic and other waste on a sandy beach. The trash includes various plastic bottles, containers, and pieces of debris. The ocean is visible in the background, and the overall scene is one of environmental pollution. The text 'Recycle!!!' is overlaid in green on the image.

Recycle!!!

This is what I think about pollution and deforestation.

Why You should Recycle

Because it is better for Animals, You, Environment, Society, Economy, and most importantly The Earth

Deforestation

Deforestation is a huge problem in the United States. We cut down 2.47 million trees every day and that makes a huge impact to our planet. To save our forests and animal habitats recycle your paper and you could make a big difference in how we save our Earth.

Recycle story

Rethink The Future, Recycle by Earth Tribe

Zazzle

WE have to fix this world. Sooner or later our world is going to fall apart if we don't do something. We have to stop polluting our earth. The future's in our hand and we have to do something about it. So let's help our earth let's help our oceans. Stop this madness. Reduce, reuse and recycle.

pollution

In the process of making land, water, air or other parts of the environment are damaged. With dirty and not safe for sustainable habitats.

Deforestation

People have been cutting trees down for years. Trees do not grow back when they are cut down so the animals in the forest can not survive in there. People have been cutting more trees down than they need to. Many animals have been barely surviving because of the trees gone, animals like, squirrels, birds, deer, woodpeckers, even racoons have been losing their homes because of deforestation. They need the trees to survive. Trees are some of the main food sources for some animals.

We Wrote Slogans for Recycling!

THE WORLD NEEDS TO RECYCLE

we have to stop throwing trash in the ocean

POLLUTION is NO SOLUTION!

Only you can clean the earth

Only you can

Only you can change the world by cleaning it and recycling and having our world clean and don't throw away stuff reck.

We can recycle at schools too

We Wrote Slogans for Recycling!

ONLY YOU could
CLEAN the earth

We have to stop throwing
trash in the ocean or the
trash is going to kill the fish.

Take the
RECYCLE

Challenge

and help the earth!

JUST Clean earth

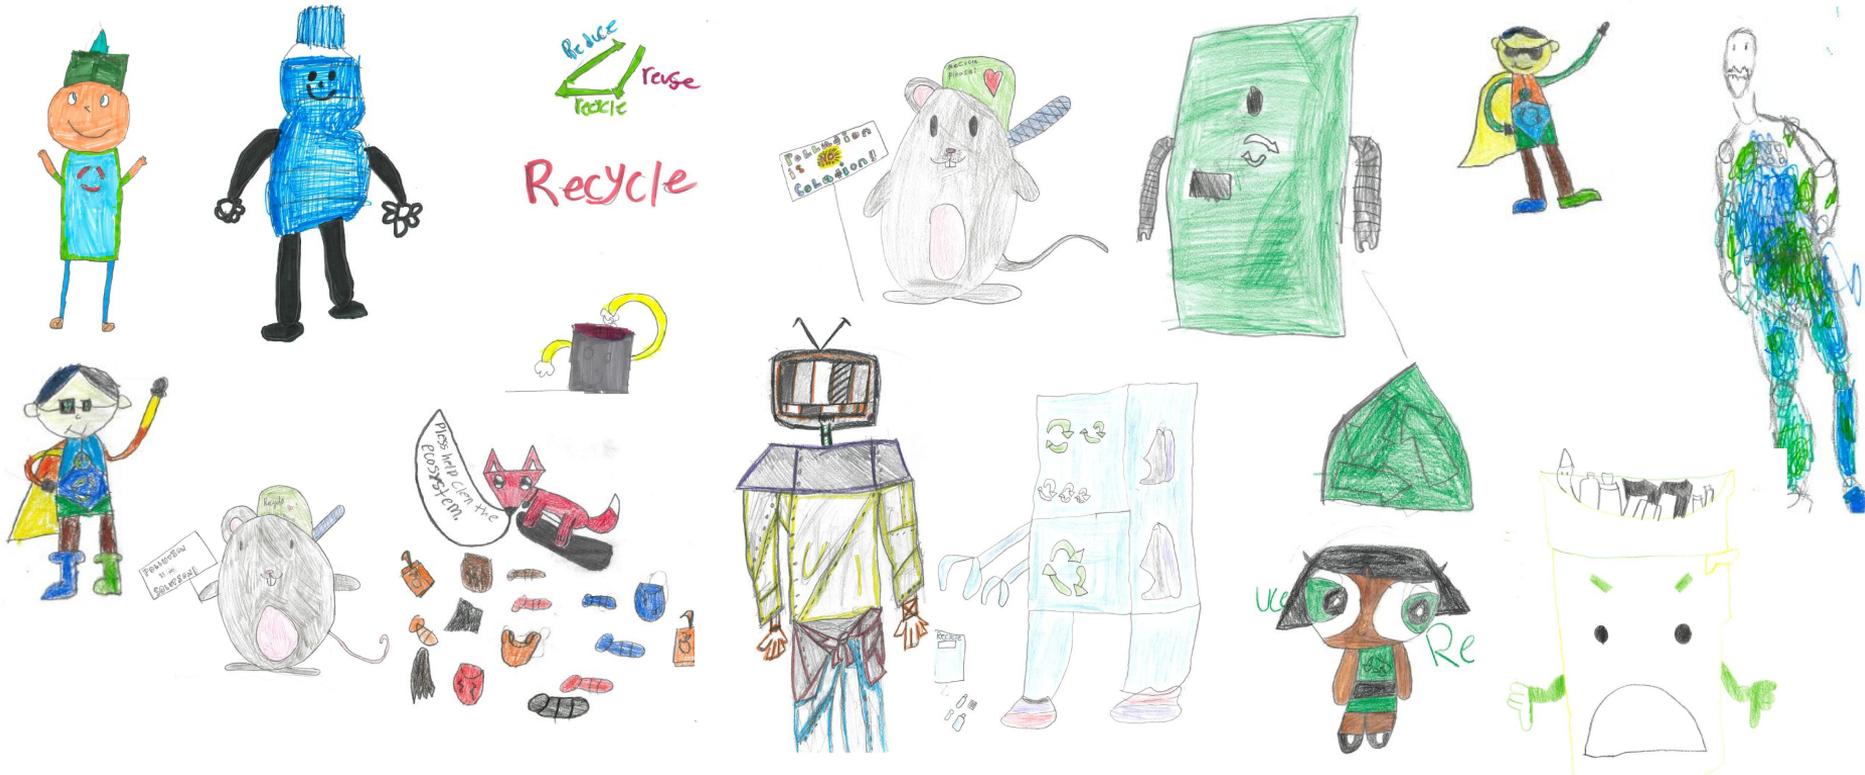

Reducing pollution

is our SOLUTION!

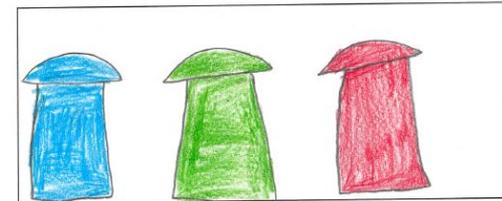

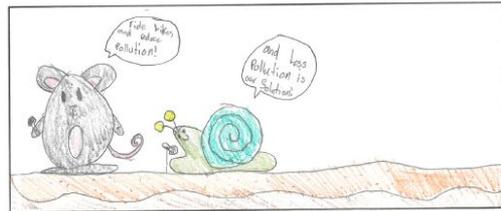

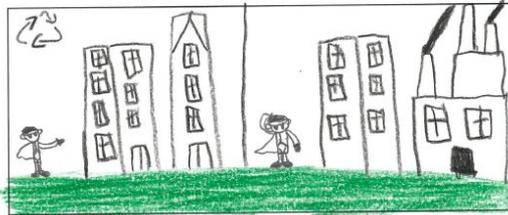

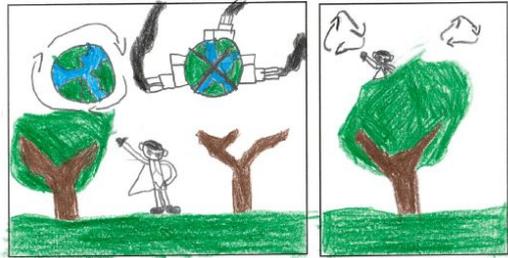

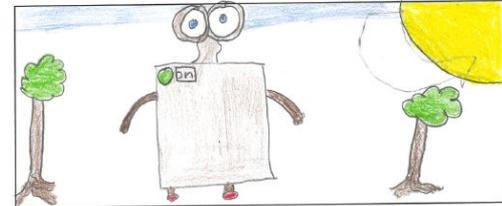

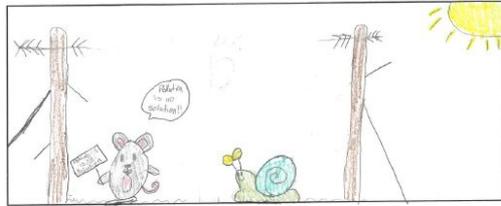

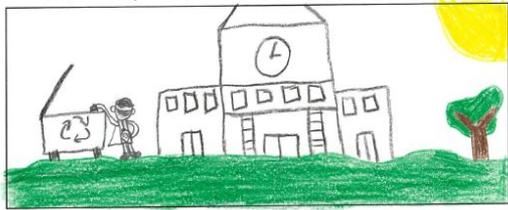

Be NOSTALGIC. Reduce
Reuse Recycle

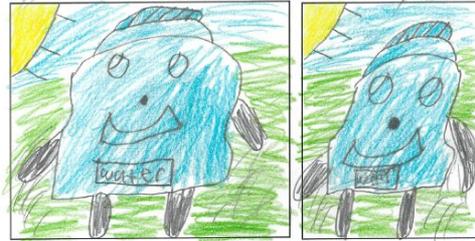

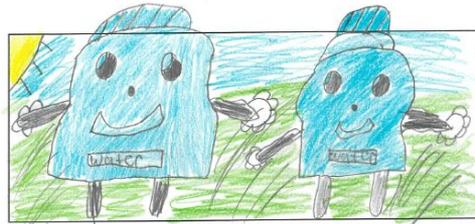

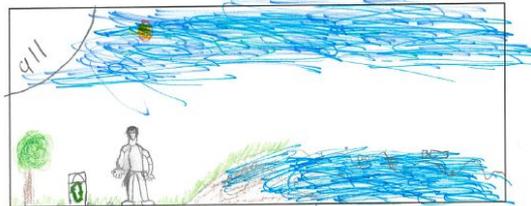

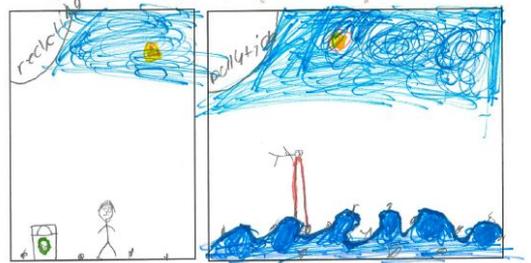

We Designed Recycling Characters to promote recycling in schools!

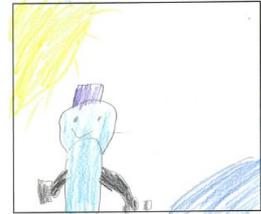

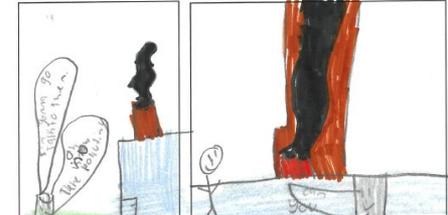

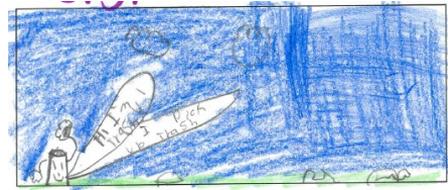

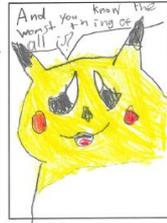

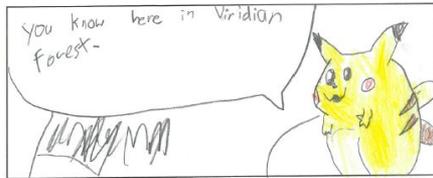

Our Recycling Character's Comics Promoting Recycling!

Our Recycling Character's Comics Promoting Recycling!

Our Recycling Character's Comics Promoting Recycling!

Our goal is to start a Recycling Policy

In our School District to help us contribute to sustainability for the planet .
