PSA

My idea

- My idea for a PSA is a challenge for kids to save energy at home! :)

The craft

- This challenge will start with a simple craft
- These items are what will be needed:
- Popsicle sticks
- Glue
- Construction paper
- Markers
- Scissors

Complete craft

- It should look similar to this when completed except for on the stick you should write a way to save energy for the day. Look on the next slide for some ideas you can write.

Popsicle ideas

- Unplug any devices that you are not using
- Read a book instead of watching TV
- Open the doors instead of using fans
- Use the sun to dry off wet clothes that have just come out of the wash
- Turn off lights when not needed and use natural light as much as possible
- Take a speaker into the bathroom and only take a shower as long as 3-4 songs (12-16 minute showers)
- Turn off water when not needed Examples: when brushing teeth or showering
- Use your lights as late as possible

How you use them

- You can use these sticks when ever you would like it could be once or twice a week or the entire week. It really depends on how much money you would like to save.

What this teaches kids

- What this teaches kids is how to stay behavioral energy efficient at home.

The end

- I hope you enjoyed my presentation and is worth your while. The end. Bye bye 🤝
