

CCMES Mrs. Vice & Mrs. Michalik
Project Recharge - Sustainability Club
 Project Abstract

Group Abstract: Our 6 person Sustainability Club will create a PSA video about sustainability and battery recycling. Club partners do short grade appropriate PSA presentations for K-1, 2-3, and 4-5 students to share information about non-renewable resources and the importance of battery recycling. We are involving our community by facilitating a battery drive hosted by our local Elks lodge in partnership with Redwood Materials. PSA flyers will be shared with participants as well as on social media platforms that the district uses.

<p>Jonah Piceno Our PSA is about sustainability and Reusing Renewable stuff such as Tesla batteries. Our battery drive can help our environment last longer. It is very important to recycle non-renewables and stuff that can be used again.</p>	<p>Prince Brambila Our PSA is about sustainability and reusing batteries and other stuff to keep the earth clean .</p>	<p>Nalani Aguilar Our PSA is about sustainability and the importance of recycling batteries, plastic ect. why we want to do this is so we can help the world be less polluted.</p>
<p>Sophia Chia Our PSA is about sustainability. We are also doing a battery drive and creating a presentation for our grade level that we were assigned for them to know about the importance of battery recycling.</p>	<p>Trisha Jenks Our PSA is about sustainability and we are making posters and slide shows about sustainability and our battery drive so we can stay on for generations.</p>	<p>Chloe Carney-Downs Our PSA is about sustainability. We are doing a battery drive so we can protect the earth. So don't throw away toys with batteries; give them to your parents and recycle them.</p>
